via Carducci 3, Tradate (Varese)**

As the war widens, the war draws closer. As the “Ukrainian front” spreads to Russia and the violence of the Israel-system strikes throughout West Asia and spreads to Lebanon, in Italy the new set of “helmet and baton” laws known as DDL 1660 is about to be approved by the Parliament. A package of securitarian laws *against struggles and against the class of the exploited* that - unlike the numerous securitarian packages previously churned out by all executives, right-wing, “left-wing” and *populists* - this time is also signed by the Ministry of War (sorry, “Defense”...). More than a calling card, a program for a society in permanent war mobilization that closes ranks and cannot tolerate any form of dissent.

But here and there breaches also open up. The strikes against the first effects of the war economy, the blockades of ports and various logistical infrastructures, the occupation of universities alongside the oppressed Palestinians, the mounting desertion in Ukraine and Russia, the direct actions for Gaza all over the world: these are examples of this and show us that the ways forward are there.
